23. Problem: (use additional Sheets if necessary)
The version of Data Publisher currently installed is no longer supported by Rimage. The Rimage Software needs to be upgraded to the latest version. The correct version of Rimage NetworkPublisher Multi-Platform is available on the SDK Disk v 6.2. This software is available as part of the Rimage SDK. This new version of Rimage NetworkPublisher will lose the FTP Get functionality. Consequently, this creates a need to put an FTP Server on the Rimage Box to allow for FTP push's from client machines.

24. Proposed Solution: (use additional sheets if necessary)
Install the IIS FTP services that are a component of Microsoft Windows 2000 and XP professional. This can be installed by using the original installation discs for Windows. A PDS account with proper permissions for the FTP Server needs to be created. Install Rimage NetworkPublisher Multi-Platform v 6.2 from the Rimage SDK CD. All CDs are available from Dana Kitt

25. Alternate Solution: (use additional sheets if necessary)
N/A

26. Consequences if Change(s) are not approved: (use additional Sheets if necessary)
We will be running unsupported software on the Rimage box. Additionally the old software does not provide additional functionality introduced in the latest Rimage Software Release
